

The background of the slide is a traditional Chinese ink wash painting. It depicts a misty, mountainous landscape with a winding path or river. In the foreground, there are dark, textured brushstrokes representing rocks or dense foliage. The overall style is minimalist and evocative, typical of classical Chinese art.

Preserving a Legacy: The Lee AnCheng Curating Platform & Exhibition Website

Connecting Traditional Ink Art
to the Global Stage

Launching December 2026

A Master's Legacy, Dispersed.

Lee An-cheng's (1959–2015) groundbreaking works are currently safeguarded across the private collections of family and friends.

While physically safe in the hands of loving custodians, this decentralized ownership creates a logistical wall. Large-scale international curation—such as upcoming initiatives targeting galleries in France—is profoundly complex to organize, track, and execute.

In Harmony with Light and Dust

A secure, centralized digital database seamlessly feeding a **public, dual-language** (English and Traditional Chinese) presentation website.

We are building a bridge. This platform connects the intimate, physical guardianship of the family with the global demands and visibility required by international curators.

The Architecture of Curation

1

The Vault (Backend)

Security, Exhaustive
Metadata, Transit &
Ownership Tracking.

2

The Engine (Curation)

Dynamic Narratives,
Thematic Groupings,
Taxonomy Filtering.

3

The Gallery (Frontend)

Global Access,
Showcase Control,
Dual-Language Interface.

Private Ownership & Transit Security

A role-based backend designed strictly for authorized Administrators and Editors.

Location Tracking: Real-time, private logging of exactly which family member or friend currently holds which physical piece.

Transit Logs: Secure status tracking required when artworks are shipped abroad or loaned to external galleries.

Privacy First: Custodian contact details and private ownership data remain strictly confidential and are completely hidden from the public-facing site.

Generating New Narratives

The platform acts as an active curatorial assistant. By tagging works dynamically, it suggests compelling exhibition groupings adapted to specific international gallery spaces and curatorial themes.

Curatorial Filtering Parameters

Era	Technique	Material	Mood / Theme
Early Explorations (1979)	Fluid Wash Blending	Single-layer Xuan Paper	Figurative Landscape
The Keelung Period	Heavy Ink Layering	Textured Korean Hanji	Abstract Topography
Mountain Seclusion (2000s)	Flying White (Feibai)		Internal Mental Imagery
The Kaohsiung Period	Flat vs. Calligraphic Brushwork		

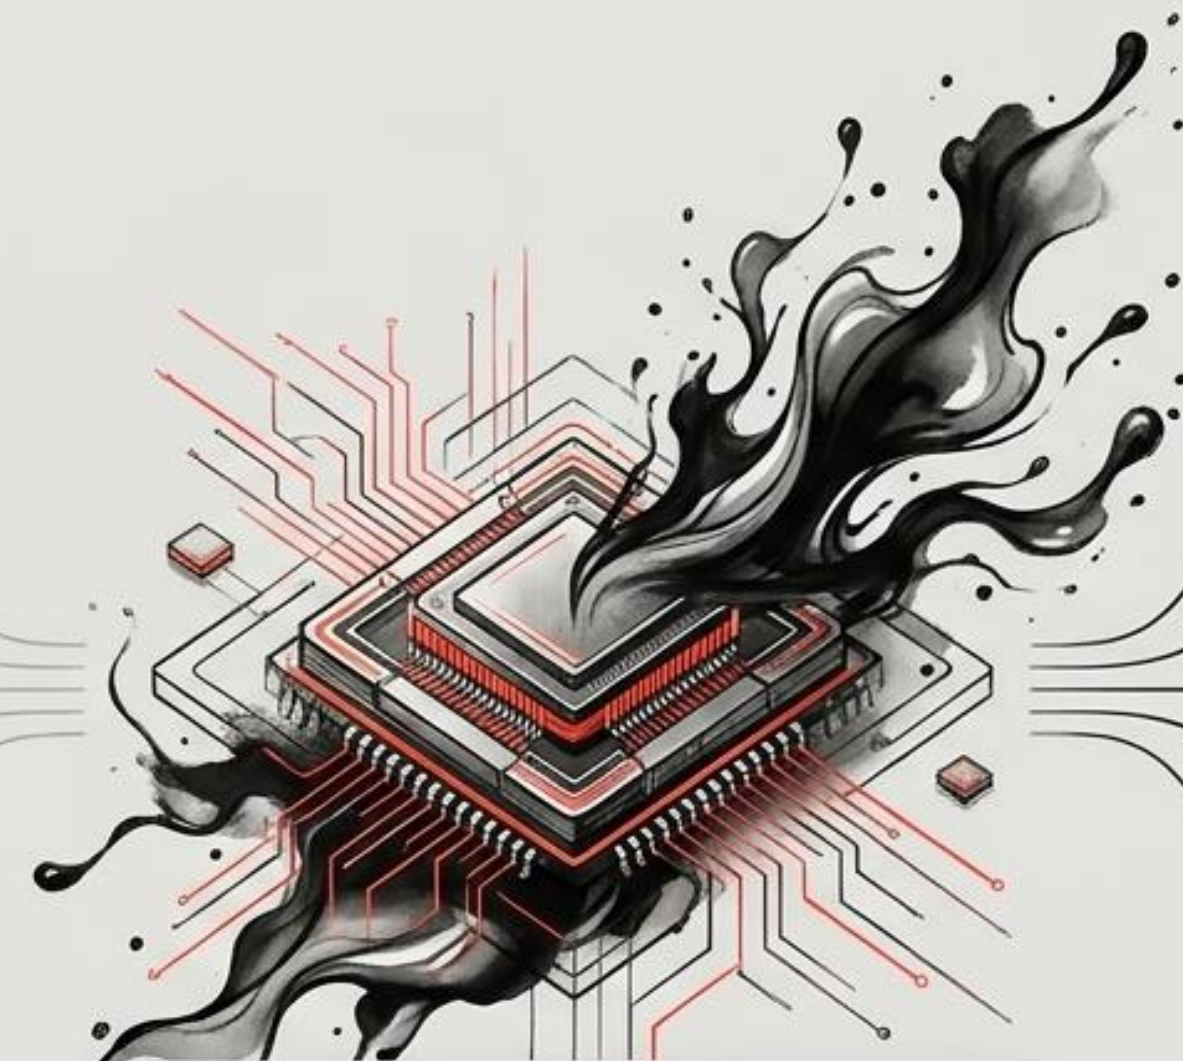

Input (Raw Metadata)

Creation Year
(1979–2000s)

Technique
(Ink blending, flat brush)

Influence Elements

Physical Size

The Engine (Dynamic Filtering):
Platform instantly correlates tags to match specific international gallery requirements and spatial dimensions.

Output (Curatorial Narratives)

Exhibition
Proposal

Generates bespoke gallery proposals (e.g., 'The 1980s Transitions', 'Late 2000s Series').

Tailors the storytelling specifically for European curation sensibilities.

Preserving the Physicality

Exhaustive digital condition reporting built to satisfy the highest international museum standards.

- Conservation Status & Detailed Condition Reports
- Material Specifications (e.g., single-layer Xuan paper vs. Korean Hanji)
- Exact Frame Dimensions & Unframed Specifications
- Custom International Shipping & Crating Requirements

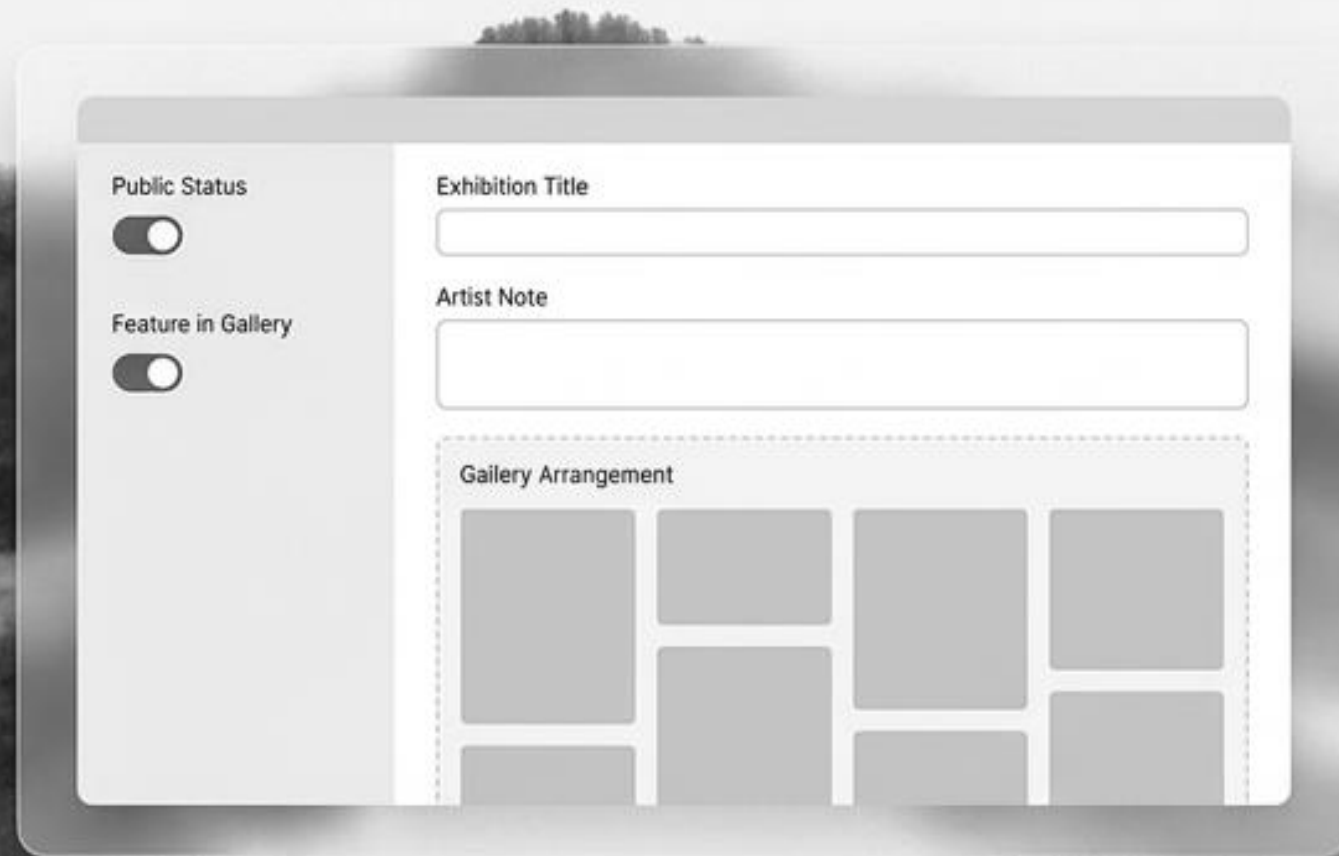

Curatorial Control

Empowering family editors to shape the public narrative.

- Curate and group showcased works specifically for upcoming international exhibitions.
- Toggle public visibility on/off for individual pieces instantly.
- Customize and lock in translated public titles and descriptions prior to any global launch.

Showcase Backend (Editor Controls)

The image shows a web-based editor interface for a digital art gallery. On the left, there are two toggle switches: 'Public Status' and 'Feature in Gallery', both currently turned on. To the right of these toggles are two text input fields: 'Exhibition Title' and 'Artist Note'. Below these fields is a section titled 'Gallery Arrangement' which contains a grid of eight gray rectangular placeholders for artwork, arranged in two rows of four. The entire interface is presented within a light gray rounded rectangle.

Gallery Arrangement

-  **Privacy First:** Editors select exactly which works are featured publicly.
-  **Customization:** Override internal database labels with customized public exhibition titles.
-  **Curation:** Visually arrange and organize digital galleries before publishing.

Public Presentation Website

High-Resolution View

-  **The Visuals:** High-resolution, zoomable image galleries built to captivate.
-  **The Story:** An immersive, interactive timeline tracing Lee An-cheng's evolution.
-  **The Context:** A bespoke, bi-lingual global biography crafted for international art critics and historians.

The Global Stage

A breathtaking, dual-language interface designed to captivate international curators and institutions.

High-resolution, immersive digital galleries.

Interactive timeline mapping Lee An-cheng's life and artistic evolution.

Bi-lingual artist biography tailored specifically for the global art market (English & Traditional Chinese).

Path to Launch (2026)

September: Phase 1
(Foundation)

November: Phase 3
(The Gallery)

October: Phase 2
(The Vault)

December: Phase 4
(Launch)

Phase 1: Foundation (September)

Database schema design & secure hosting environment setup.

Bulk high-resolution image import (Targeting the 52 key cataloged paintings spanning 1979-2000s).

Phase 2: The Vault (October)

Admin portal development and user interface design.

Role configuration and security permissions (Admins vs. Editors).

Implementation of the private ownership, location, and transit tracking modules.

Phase 3: The Gallery (November)

Public-facing website design & frontend UI development.

Integration of the interactive historical timeline.

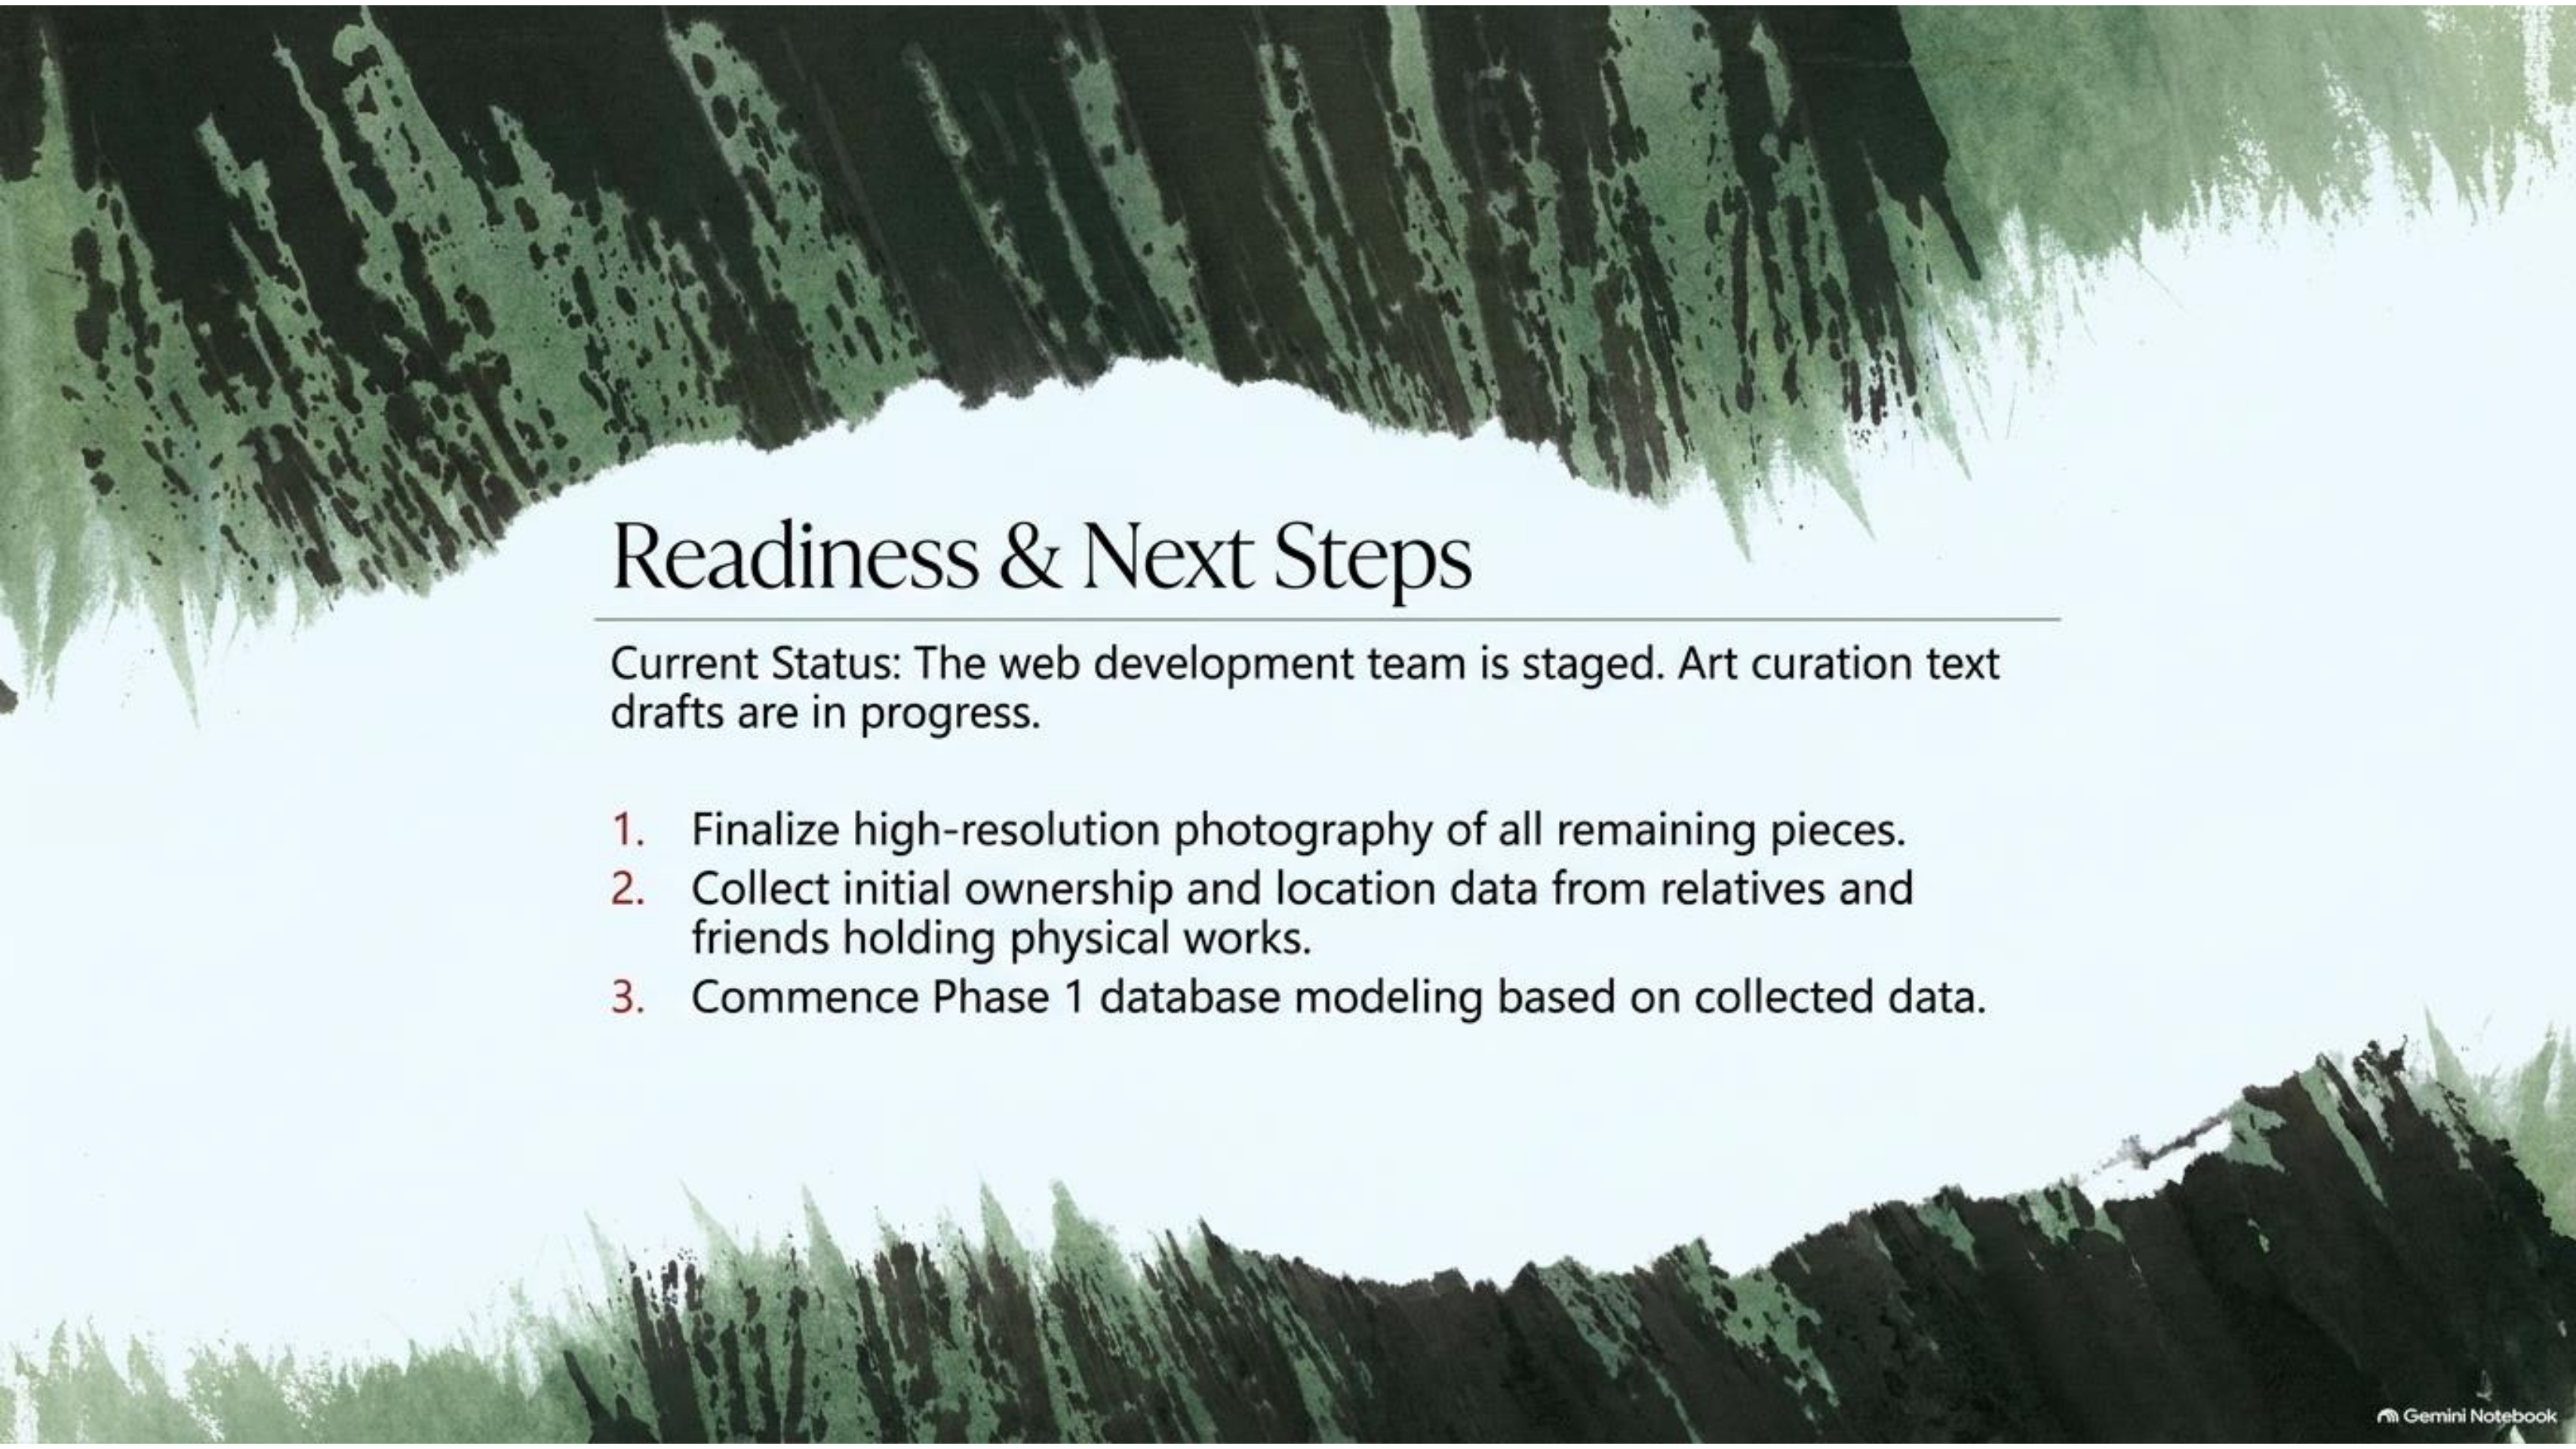

Showcase selection backend for family editors.

Phase 4: Refinement & Launch (Late Nov to Dec)

3-4 week content review buffer
(Dedicated time for family review of all curated art texts and metadata).

Final security testing and Quality Assurance (QA).

Official Global Launch

Readiness & Next Steps

Current Status: The web development team is staged. Art curation text drafts are in progress.

1. Finalize high-resolution photography of all remaining pieces.
2. Collect initial ownership and location data from relatives and friends holding physical works.
3. Commence Phase 1 database modeling based on collected data.

The background of the slide is a traditional Chinese ink wash painting. It depicts a vast, misty mountain landscape. In the foreground, dark, craggy rock formations rise from a deep valley. The middle ground shows more distant, softer mountain peaks partially shrouded in mist. The upper portion of the painting is dominated by light, ethereal washes of ink, suggesting a bright, hazy sky or a thick layer of mist. The overall composition conveys a sense of tranquility and the grandeur of nature.

In Harmony with Light and Dust.

Preserving the legacy of Lee An-cheng for the world.
